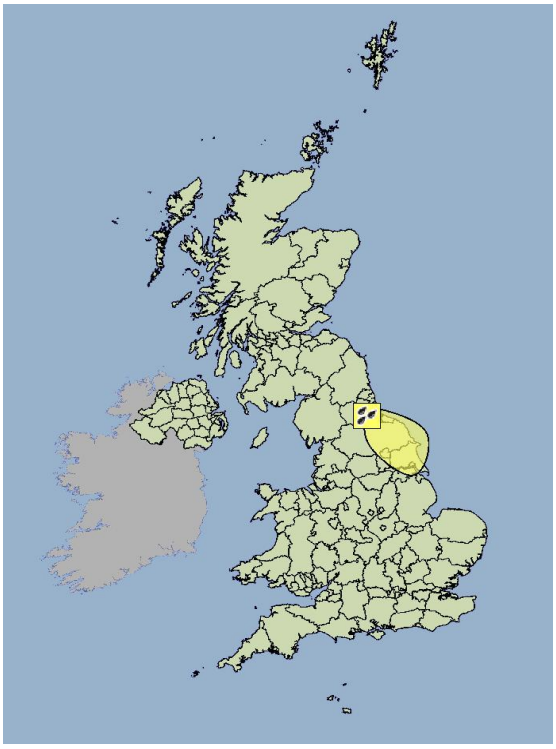
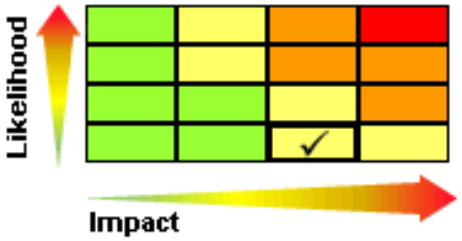
National Severe Weather Warning Service





Chief Forecasters Assessment
A slow moving frontal will bring very moist and unstable air, and an area of rain which is likely to become torrential at times, especially near the coast and windward hills. Rainfall totals are likely to be in the region of 15 to 25 mm, but near coasts and windward hills, local totals of more than 50 mm are quite possible.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **21:00 on Tue, 31st May 2016** until **12:00 on Wed, 01st Jun 2016**

Outbreaks of rain will affect parts of eastern England through much of Tuesday night and Wednesday morning, with the rain becoming torrential at times with the risk of thunder, especially near coasts and over hills exposed to the northeast. Please be aware of the risk of local surface water flooding.
